Order Management

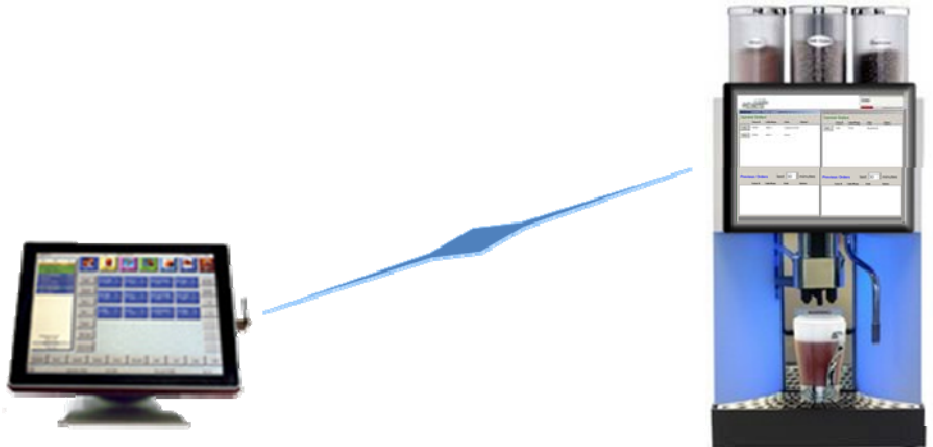

Reduced Training & Labor

Reduced Shrinkage & waste

Operational Efficiency

Enterprise Level Management

AutoPerk™ provides an automated interface from the POS to the Super Automatic Espresso/Coffee machine...

Beans Ground Fresh Every Cup

This process guarantees that the customer receives what they paid for consistent in quality. In locations that have multiple Coffee/Espresso Machines **AutoPerk™** software will balance machine queues to increase speed of service without sacrificing quality or consistency!

Operational Benefits and Savings

Reduced Training

The automated process minimizes employee skill and training requirements, which is critical to the success in environments where staff turnover is a fact.

Increased Speed of Service

Automated order delivery from the POS to the Espresso/Coffee Machine, streamlines the order preparation process; eliminates the clutter and confusion around passing orders via cups, or receipts.

Reduced Shrinkage & Waste

The connection of the POS to the Super Automatic brewing machine provides accurate recording of actual drinks made including remakes and eliminates sweet hearting drinks to friends and records employee drinks.

Increased Customer Satisfaction

Quickly delivering the correctly prepared, consistent quality gourmet coffee makes the coffee experience very positive. With the freed up resources provided by this automation your employees now have the time to give each customer that extra special attention that makes your service true hospitality!
